

Iefan (ei-fa-an)

Cloud Solution Architect, Linux Administrator, and Developer

Contact: realiefan@outlook.com

Professional Summary

Innovative Cloud Solution Architect with over 2 years of experience in developing, deploying, and managing cloud applications for diverse clients and open-source communities. Expertise in Linux OS, AI models, and progressive web applications. Demonstrated ability to independently deliver high-impact projects, create reliable backup systems, and implement effective monetization mechanisms. Known for driving technological advancements and excellent communication skills, including conference speaking engagements.

Professional Experience

Nostr Protocol | Cloud Solution Architect

2022-2024

- Architected and implemented a robust backup system, enhancing data reliability for over 500,000 users.
- Designed and integrated a secure monetization mechanism for digital content transactions, resulting in a 20% increase in user engagement.
- Led cross-functional collaboration efforts to ensure seamless integration of solutions, improving overall system performance and reliability.

Alby | Cloud Solution Architect

2023-2024

- Transformed Alby's website into a Progressive Web Application (PWA), significantly enhancing user experience.
- Implemented advanced caching and notification features, resulting in a 30% boost in user engagement and improved site performance.
- Delivered a keynote speech at the "Workbox Conference," sharing insights on PWA development and implementation strategies.

Independent Projects | Developer

2021-2024

- Developed multiple high-usage applications, with three projects achieving over 20,000 weekly active users each.
- Focused on user-centric design and functionality, ensuring high engagement, satisfaction, and retention rates.

- Leveraged cutting-edge AI models to enhance application features, resulting in improved user experience and functionality.

Skills

- Cloud Solutions Architecture
- Linux Operating System
- Artificial Intelligence Models
- Progressive Web Applications (PWAs)
- Backup and Reliability Mechanisms
- Monetization Tools Development
- Advanced Caching and Notifications
- Public Speaking
- Project Management
- Cross-Functional Team Collaboration

Education

University of Delhi, MLNC

Bachelors in Economics and Business Studies
2019-2022

IGNOU (ongoing)

Masters in Computer Science and Mathematics
2024-2026

Certifications

- AWS Certified Solutions Architect – Associate
- Certified Kubernetes Administrator (CKA)

Key Projects

Backup Mechanism for Nostr Protocol

Developed a highly reliable backup system serving over 500,000 users, significantly reducing data loss incidents.

Monetization Mechanism

Created and integrated tools for monetizing digital content with privacy, boosting user engagement by 20%.

Progressive Web Application for Alby

Implemented advanced PWA features, increasing user engagement by 30% and enhancing site performance.

AI-Enhanced Independent Applications

Developed several high-usage applications with over 20,000 weekly active users each, focusing on user-centric design and AI-driven features.

Publications & Speaking Engagements

- Keynote Speaker at "Workbox Conference" on Progressive Web Applications and their impact on user engagement.
- Regular contributor to tech blogs and forums, sharing insights on cloud architecture, Linux administration, and AI integration in web applications.
- Panelist at various tech meetups, discussing the future of decentralized technologies and their implications for data privacy and security.

Open Source Contributions

Active contributor to open-source communities, with notable projects enhancing reliability, monetization, and user experience in cloud-based applications. Key contributions include developing plugins for popular frameworks and creating documentation to help new developers navigate complex cloud architectures.
